With strategically located offices and depots nationwide, coupled with a dedicated workforce, Goscor Access Solutions offers unparalleled service in access platform sales, rentals and technical support. Our diverse fleet of machines ensures absolute safety when working at height – be it low-level personnel lifts for indoor work right through to super booms at 57 meters and telehandlers for material handling.

Whether looking to rent or own, our passionate staff are ready to assist and will guide you through the process of selecting the correct machine, handling the paperwork, logistics, training and certification – all with the famous 24/7/365 back up that has been the backbone of our success since 2011.

Our equipment is all latest generation, sourced from only the best suppliers worldwide with brands such as Genie, ATN and Holland Lift, all of which we are exclusively appointed agents for in Sub-Saharan Africa. We boast some of the most technologically advanced machinery on the continent with the highest diesel and electric scissor lifts, highest crawler boom lift, and our unique articulated booms with stabilizers. These innovations not only keep us at the forefront in the local market, more importantly they provide you the client with absolute peace of mind from a safety aspect.

Need parts or a service on your own equipment? Our qualified technical team can assist you and have an extensive stockholding on hand.

Our training centre is both internationally (IPAF) and locally (SETA) accredited and will ensure that your staff have the necessary qualifications and skills, both to operate equipment safely and perform daily checks to prevent unnecessary downtime.
